Summary

Product-minded engineer with 3.5+ years across B2B platforms, e-commerce, and client projects, focused on understanding user behavior and the problem behind a feature before deciding what to build. Cut an e-commerce checkout from 5 steps to 2 after studying how users moved through it, and mapped school and student needs to shape a platform used by 10,000+ students. Hands-on with AI products, including a RAG system with grounded prompting to control hallucinations, and moving from engineering into product management.

Skills

- **Product:** Problem Framing, User Behavior Analysis, Requirements Definition, Customer Discovery, MVP Scoping, Prioritization, Stakeholder Communication, Go-to-Market
- **AI and Data:** LLM APIs (Gemini, OpenRouter), RAG, Prompt Design, Hallucination Mitigation, SQL, PostgreSQL
- **AI Tools:** Cursor, Claude, ChatGPT
- **Technical Fluency:** JavaScript, TypeScript, React, Node.js, REST APIs, AWS

Experience

Full-Stack Developer, ThinkStartup Learning Pvt Ltd *Feb 2024 – Present*

- Mapped the needs of schools and students to decide which features a B2B platform needed, owning each feature from problem definition to launch for 10,000+ students
- Learned from user behavior in the checkout flow of a multi-vendor e-commerce platform (1,000+ vendors) and cut it from 5 steps to 2, improving orders
- Measured processing cost and load time of each feature and applied caching and optimization, preparing the platform to scale to 50,000 students
- Identified a recurring manual support workload and introduced an AI chatbot with automation workflows to reduce it

Web Developer, GroupL Fze *Aug 2023 – Feb 2024*

- Gathered client requirements and weighed cost, performance, and timelines to scope a PHP to Laravel migration
- Defined how client platforms should connect with third-party services and designed REST APIs for real-time data sync
- Reworked the customer-facing interface from direct client feedback to improve usability

Web Developer, YoCreativ *Mar 2023 – Aug 2023*

- Ran requirement discovery with 10+ clients, small businesses to enterprises, and proposed solutions within budget

Founder Experience

TeenSkool, Co-Founder teenskool.in

- Co-founded an AI education platform that takes students from idea to working MVP, scoping a low-cost masterclass with Cashfree payments as the entry product to validate demand

Raahi, Co-Founder raahiclub.in

- Co-founded a social events and community brand for young professionals in tier-1 Indian cities, shaping positioning, trust and safety pages, cafe partnerships, and Reddit and influencer marketing content

Projects

Kreww, HR Management Platform *(personal project; Next.js, Supabase, JWT)* kreww.vercel.app

- Replaced manual attendance and leave tracking at ThinkStartup, now used daily by 50 employees
- Scoped attendance, leave requests, payroll, monthly reports, and geo-verified check-ins as the core modules

RAG Backend Service *(TypeScript, PostgreSQL, pgvector, Gemini API)* GitHub repo

- Built a retrieval-augmented generation service that grounds Gemini answers in source documents through pgvector semantic search, reducing hallucinated responses

Education

Bachelor of Computer Application, Kanpur University *Dec 2023*
